

# SEMI-AUTOMATIC FILLING MACHINE

ZBL1000

The Zumex **ZBL1000 Semi-Automatic Filling Machine** for filling bottles of different materials and sizes (200 ml to 2 l) with natural juices, with average capacity of 300-350 l/h.

## TECHNICAL CHARACTERISTICS

## CHARACTERISTICS

It has a container **conveyor that adapts in width** to the filling machine, with container centring device at filling nozzle and pneumatic barrier for the intermittent passage of containers.

To fill them with juice with pulp, it has 2 automatic total section nozzle tips, programmable from the **Control panel** for packing modalities, and CIP with automatic dispensing system and filling control system by means of digital dispensing indicator with 99.5% precision.

For different materials and sizes, from 200 ml to 2l.

## ESTIMATED PRODUCTION

250 ml container	≈ 15 units/min	≈ 225 l/h
0,5 l container	≈ 10 units/min	≈ 300 l/h
1 l container	≈ 6 units/min	≈ 360 l/h
2 l container	≈ 6 units/min	≈ 720 l/h
